A software developer with more than **5.7 years** of work experience, I work as an IT professional.

I am open to working with alternative technologies. With confidence and friendliness, I am able to work both individually and in teams effectively. As a problem-solver and analytical thinker, I am adept at solving problems.

I am excited to learn about the latest technologies in the market and I have already developed a good knowledge of **Web 3.0**. I would like to learn more about them in the future.
